TRUMP TOP 10 ACCOMPLISHMENTS IN DETAIL

We finally have a President and an Administration truly committed to tackling the many existential problems facing America. Here are some of the more important accomplishments.

01 SECURED OUR BORDER

Stopped the invasion, including criminals, terrorists, and drugs. Has a deportation policy that is reducing crime, cutting welfare costs, and reducing school and hospital crowding and housing shortages.

03 REFORMED WELFARE, UNCOVERED, AND IS ELIMINATING FRAUD

Work requirements for welfare and no welfare for illegals have already cut 5 million people from the Food Stamp Program. VP Vance leads an initiative to uncover and prosecute fraud in Minnesota, California, and elsewhere.

05 HAS IMPROVED AFFORDABILITY AND CONTINUES TO DO SO

All items above will contribute to affordability. Inflation was .16%/mo. for the first Trump term and .39%/mo. for Biden. Currently it is .21%/mo. for Trump, but that is temporary because of the gas prices caused by Trump's very courageous effort to save the world rather than worry about politics.

07 IS WORKING TO MAKE AMERICA ENERGY INDEPENDENT

The administration is working aggressively to reduce the obstacles and provide incentives and funding to help revitalize the coal and nuclear energy industries, as well as continue to do everything they can to increase oil and gas production. At the same time, they are reducing subsidies and reliance on costly and unreliable green energy.

09 IS EXECUTING A BRILLIANT FOREIGN POLICY

Trump is drastically reducing Chinese and Russian mischief by locking them out of Venezuela and depriving them of oil, as well as doing the same in Iran. He has also acquired permanent military bases in Greenland and locked them out of there also. He is the first president in 47 years with the guts to stop the ever-increasing Iranian terrorist activity culminating in nuclear weapons that would allow extorting the world. It is impossible to cover briefly all that he has accomplished in foreign policy and its strategic significance.

02 MASSIVELY REDUCED THE NUMBER OF GOVERNMENT EMPLOYEES

Eliminating agencies and progress on eliminating the Dept. of Education cut tens of thousands of employees, and the requirement to come back into the office caused hundreds of thousands to quit. The government workforce is now the lowest since 1966!

04 STOPPED THE SCHEDULED TAX HIKE AND INCREASED TAX DEDUCTIONS

When Trump's large tax cut of 2017 was set to expire, he was able to get Congress to make it permanent, as well as add further tax cuts on tips, overtime, and Social Security – all without a single Democrat vote.

06 HAS DRAMATICALLY REDUCED CRIME

Murders are at a 70-year low. He has helped mayors and governors who have asked for help and embarrassed mayors in blue cities to do more on their own. Arresting hundreds of thousands of criminal illegals has sharply reduced crime, as has stopping new criminals and drugs from coming into the country.

08 HAS RESTARTED CRITICAL MANUFACTURING IN AMERICA FOR NATIONAL SECURITY AND JOBS

Used tariffs to encourage massive foreign investment in U.S. manufacturing, including steel plants, advanced semiconductors, pharmaceuticals, rare earth minerals, military hardware, and munitions.

10 IS PUTTING A STOP TO DEI AND OTHER WOKE NONSENSE

Stopped schools from teaching that White people are the biggest problem in America, as well as gender change surgery for children and men competing in women's sports. He promotes merit-based hiring and wants to eliminate using skin color to evaluate Americans for anything.

Unlike most politicians, he is doing what he promised during the elections and is going after the root causes of our problems rather than putting on Band-Aids.
